Amsterdam 1 Data Center

## Home to the Cloud

Amsterdam is the capital and most populous city in the Netherlands and is an international trading center due to its busy port and great transport links. Amsterdam is the economic hub of the Netherlands, boasting one of the most important financial centers in Europe. The Amsterdam Stock Exchange resides in the city, which is the oldest stock exchange in the world. Many of the world's biggest companies have made their European headquarters in Amsterdam, and in light of the recent Brexit uncertainty, some companies have moved their European headquarters from London to Amsterdam. Moreover, the technology and ICT industry are thriving in the city, as it has become a vibrant hub for technology innovation and start-ups, recently ranked as the fourth top global tech hub in the Savills Tech Cities 2019 report.

As a data center location, Amsterdam has risen to become one of the most important colocation ecosystems and occupies the third largest market in Europe. With the city's leading internet exchange and transatlantic fiber optic connections, Amsterdam's technical infrastructure serves both as a provider and contributor to today's digital economy. The Netherlands' rising reputation as a strategic technology location has not gone unnoticed with global hyperscalers making large scale data centers and digital infrastructure investments across the country. At the same time, data center operators such as the Global Data Centers division of NTT Ltd. continue to address the

growing demand for colocation services within this market. Amsterdam 1 is positioned in the Schiphol-Rijk district of the city, an ideal data center location due to its centrality and excellent connectivity links.

The campus offers high availability, scalable data center space with high power density, carrier neutrality, flexible colocation spaces, cloud network access, connectivity and on-site support.

The first phase of Amsterdam 1 was opened in April 2019. Clients can choose flexible colocation deployments from single racks to cages and suites or select larger shell and core building space with client implementation if needed.

## A solution for every requirement

With a total of 8,000 sqm of IT space and an IT load of 20 MW in phase 1, Amsterdam 1 offers complete solutions for housing your IT and network systems in a secure, high-availability environment. We provide you with the best possible physical and technical infrastructure supported by 2n UPS systems, generator backup as well as highly redundant cooling systems. Amsterdam 1 holds multiple certifications and is connected to major carrier hubs and cloud networks as well as to the AMS-IX hub. To validate hybrid cloud services and innovations faster and at lower cost, our **Technology Experience Labs** provide the perfect hosted ecosystem in a live data center environment.

## Secure and flexible space built to your specifications

Your requirements are the most important aspect of our service offering. You choose, we deliver. Whether you select a building shell which you configure yourself, or we construct it according to your specifications, or you even want to rent a single rack in our shared environment, we satisfy any option. We will also ensure the space is highly available through our years of engineering critical data centers whilst maintain high levels of security to keep your infrastructure and data safe.

### Overview of our main product offerings:

<b>Fully-fitted</b>	Colocation rack Carrier rack
	Cage
	Suite
<b>Shell and core</b>	Area
<b>Supporting products and services</b>	Multi service interconnection platform
	Cross connects
	Remote-hands

## Infrastructure

### Data center space

- 8,000 sqm of IT space currently constructed with planning for additional 8,000 sqm
- flexible colocation deployments: single rack colocation, cages, suites, turnkey build to suit and shell and core solutions
- ancillary space options (offices, storages and pre-installation rooms) available
- common areas such as meeting rooms, catering area and showers

### Cooling

- high efficient chiller systems with free-cooling integrated and separated coolers and own-programmed, weather-dependent energy management systems
- CRAH units in the suites and technical rooms
- concurrently maintainable AHUs providing fresh air pressurization and humidity control to data suites
- cold aisle containment to support high densities and maximize efficiencies

- heat recovery with heating pumps for pre-heating the emergency standby power systems

### Power

- 60 MVA gross power from two substations on 20 kV level (once fully built out)
- maximum client IT load of 40 MW (once fully built out)
- maximum power density up to 2.5 kW/sqm
- two separate UPS systems (A- and B-supply) with 2n redundancy
- redundantly designed emergency power system with diesel generators n+1

### Fire protection

- automatic digital fire alarm system on all levels with point and air aspiration detectors
- Very Early Smoke Detection Alarm Systems (VESDA) in the return air path
- firefighting system based on a nitrogen extinguishing gas system
- fire protection walls to a minimum of 90 minutes separation

### Security

- 24/7 Security Operations Center and Operation Control Center
- redundant monitoring of all critical functions underpinned by standardized security processes and the multilevel security zone principle, secures the rental area and the technical operation
- palisade fencing supported by a security perimeter fence to protect the campus
- video surveillance systems for the external perimeter, plant areas, and data halls
- ram-raid bollard protection in accordance to BS PAS 68:2013
- card swipe entry/exit to all doors and persons separation locks per data center building
- preventive risk assessment as well as continuous testing and training of operating personnel

### Connectivity

- carrier neutral
- redundant Carrier-Meet-Me-Rooms
- Carrier Access Rooms per building

- carrier mix from global tier 1 supplier to regional supplier
- redundant, structural cabling infrastructure with diverse paths
- pre-cabling to support fast cross connect deployments
- high performance internet access
- inter data center connectivity between NTT data centers for geo redundant solutions
- multi cloud interconnection platform to connect our clients to major cloud service providers such as Amazon Web Services, Microsoft Azure and Google Cloud Platform

#### Additional services

- consulting, general and implementation planning for development projects
- client implementation
- installation services
- 24/7 remote-hands services
- facility services
- additional security services

#### Global data center network

- part of the NTT family of over 160 data centers around the world
- connectivity options to the global NTT network
- access and use of Technology Experience Labs with a worldwide partner network

#### Service Level Agreement

- 99.999% power uptime availability
- climate control conditions in line with ASHRAE guidelines
- connectivity availability

#### Technology Experience Lab

- **Technology spaces:** Globally available facilities in productive data centers of NTT that bring together more than 140 technology partners to enable prospects and clients to test and validate, but also innovate on the latest technologies.
- **Industry communities:** Today, information technologies are a key enabler to many organizations. Our industry communities help these organizations to identify relevant technology providers and connect with helpful contacts.
- **Start-ups and Venture Capital:** Many times, start-ups are major drivers when it comes to disrupting various industries. Our start-up unit brings together start-ups, corporates and venture capitalists to enable and accelerate innovation.

## Location

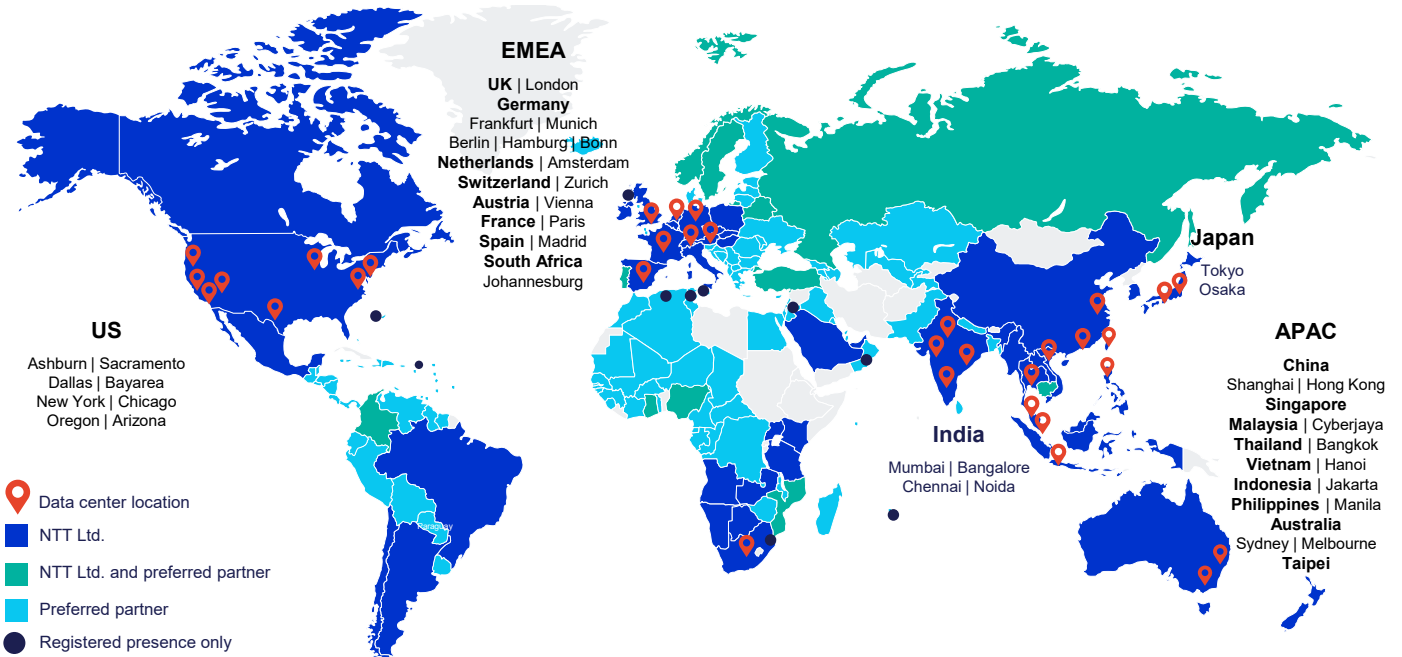

## About the Global Data Centers division of NTT Ltd.

Global Data Centers is a division of NTT Ltd. and incorporates DPA, e-shelter, Gyron, NetMagic, NTT Indonesia Nexcenter, RagingWire and other NTT Communications group data center divisions. Our combined global platform is one of the largest in the world, with over 160 data centers spanning more than 20 countries and regions including North America, Europe, Africa and APAC. As a neutral operator, we offer access to multiple cloud providers, a large variety of internet exchanges and telecommunication network providers including our own IPv6 compliant, tier 1 global IP network. Our clients benefit from tailored infrastructure and experience consistent best practices in design and operations across all of our highly reliable, scalable, and customizable data centers.

## Flexible connection to data centers and clouds: 20+ countries and 450,000 sqm server space

# NTT in numbers and facts

## Expertise

We help you to do great things.

Over **40,000**  
people are working for  
NTT Ltd. worldwide

Delivering services  
in more than  
**200** countries

**300,000**  
people are part of the  
NTT Group

## Technology solution

We have a full suite of technology  
solutions to help you create value.

## Partner

We work together with you.  
We're an extension for your business.

## Intelligent

For us, intelligent means helping you to be data driven, connected, digital, and secure.

5

regions

## Globally

We are wherever you are, making it easier for you to focus on your core business.

120

years of heritage in the NTT Group

## Outcomes

We shape the outcomes you're looking for.
